TACOLII
GEORGE LOMBARD KELLY, B.A., B.S.Med., M.D., President
EMERITUS PROFESSORS Office Address
CHARLES IVERSON BRYANS, M.D. (Ga. '04)
Andrew Jones Kilpatrick, M.D. (Ga. '96)407 Seventh Street Professor Emeritus of Clinical Obstetrics
Henry Middleton Michel, M.D. (Ga. '98)University Hospital Professor Emeritus of Clinical Orthopaedic Surgery
Eugene Edmund Murphey, M.D. (Ga. '98)432 Telfair Street Professor Emeritus of Clinical Medicine
Andrew Augustus Walden, M.D., (Medico-Chir., Phila. '02)
Everard Ansley Wilcox, B.S. (Davidson '07), M.A., (Davidson '09), M.D., (Ga. '10)2715 Bellevue Ave. Professor Emeritus of Clinical Gynecology
PROFESSORS
RAYMOND P. AHLQUIST, B.S.Pharm. (U. of Wash. '35), M.S.(U. of Wash. '37), Ph.D.(U. of Wash. '40)Medical College Professor of Pharmacology
LANE HARRIS ALLEN, B.S. (Ga. '30), M.S. (Ga. '32), Ph.D (Georgetown '35), M.D. (Ga. '39)Medical College Professor of Gross Anatomy
James Malcolm Bazemore, M.D. (Ga. '35)Medical College Professor of Dermatology and Syphilology
LESTER LLEWELLYN BOWLES, A.B. (Franklin '34), M.D. (Indiana '38)
Alfred Poyneer Briggs, B.S. (Col. '12), M.D. (Wash. '22)
Hervey Milton Cleckley, B.S. (Ga. '24), B.A.(Oxford '26), M.D. (Ga. '29)University Hospital Professor of Psychiatry and Neurology

ROBERT BARTON DIENST, B.A. (Baylor '25), M.A. (Baylor '26), Ph.D. (Chicago '33)
ROBERT BENJAMIN GREENBLATT, B.A. (McGill '28), M.D. (McGill '32)Medical College Professor of Endocrinology
WILLIAM FERGUSON HAMILTON, B.A. (Pomona '17), Ph.D (Cal. '21)
CHESTER H. HEUSER, A.B. (Kansas '08), A.M. (Kansas '10), Ph.D. (Harvard '13)
George Lombard Kelly, B.A., (Ga. '11), B.S.Med. (Ga. '22), M.D. (Ga. '24)Medical College Professor of Anatomy
*Robert Carlisle Major, A.B. (Wofford '28), M.D. (Hopkins '32)
ORVILLE A. PARKES
EDGAR RUDOLPH PUND, B.A. (Ga. '14), M.D. (Ga. '18)Medical College Professor of Pathology
JOHN ROBERT RINKER, B.S.Med. (Kansas '27), M.D., (Kansas '29)University Hospital Professor of Urology
WILFORD ARLESS RISTEEN, B.A. (Carroll College '26), M.D. (Wisc. '30)
EVERETT S. SANDERSON, B.S. (Mass. State '16), M.S. (Yale '21), Ph.D. (Yale '22), M.D. (Wash. '34)
Walter Lee Shepeard, A.B. (Kans. State '31),

Professor of Medicine in charge of Clinical Pathology

^{*}On leave in Armed Forces.

- John Hays Sherman, B.S.Med. (Ga. '20),
 M.D. (Ga. '23)......University Hospital
 Professor of Surgery
- VIRGIL PRESTON SYDENSTRICKER, B.A. (W.&L. '10), M.A. (W.&L. '11), M.D. (Hopkins '15)......University Hospital Professor of Medicine

CLINICAL PROFESSORS

- WILLIAM WHATLEY BATTEY, M.A. (Belmont Abbey '00),
 M.D. (Ga. '04)......1445 Harper Street

 Professor of Clinical Surgery
- GUY TALMADGE BERNARD, M.D. (Ga. '07).....204 Thirteenth Street Professor of Clinical Cancer
- RALPH HILL CHANEY, B.A. (Oberlin '09),
 M.A. (Oberlin '13), M.D. (Pa. '14).....1445 Harper Street

 Professor of Clinical Surgery
- WILLIAM JOHNSTON CRANSTON, M.D. (Ga. '08).............1345 Greene Street Professor of Clinical Medicine
- HARRY TAYLOR HARPER, JR., M.D. (Emory '33)......Marion Building Professor of Clinical Medicine
- Lysander Palmer Holmes, M.D. (Vanderbilt '12).....S.F.C. Building Professor of Clinical Radiology
- Julian R. Kaufman, M.D. (Louisville '36)......V. A. Hospital Professor of Clinical Medicine

FRANK LANSING LEE, B.S. Med. (Ga. '19) M.D. (Ga. '21)301 Tenth Street Professor of Clinical Medicine
ROBERT CAREY McGAHEE, B.S. Med. (Ga. '22), M.D. (Ga. '24)
PHILIP ANTHONY MULHERIN, M.D. (Ga. '30)1211 Greene Street Professor of Clinical Pediatrics
ROBERT LEWIS RHODES, B.A. (Emory '06), M.D. (Hopkins '10)
DAVID ROMULUS THOMAS, JR., B.S. (V. M. I. '26), M.D. (Ga. '30)
Leo R. Tighe, M.D. (Albany '16)
ASSOCIATE PROFESSORS
*John Burman Bowen, M.D. (Ga. '39)842 Greene Street Associate Professor of Surgery
David A. Davis, A.B. (Vanderbilt '38), M.D. (Vanderbilt '41)
NATHAN MASSEY DEVAUGHN, M.D. (Ga. '39)124 Seventh Street Associate Professor of Medicine
Philip Dow, B.S. (Mich. '27), Ph.D. (Yale '35)Medical College Associate Professor of Physiology
Wiley Stewart Flanagin, B.S. (Ga. '37), M.D. (Ga. '40)
Walter Knowlton Hall, B.S. (Oregon St. College '31), M.S. (Ore. St. Coll. '33), Ph.D. (Iowa '36)Medical College Associate Professor of Biochemistry

*On leave in Armed Forces

GARLAND FRANK JONES, JR., B.S. (Union '34), M.D. (Tenn. '37), M.S. (Ohio '40)1020 Greene Street Associate Professor of Surgery
JOHN T. MANTER, A.B. (Bates Coll. '31), Ph.D. (Columbia U. '39)Medical College Associate Professor of Microscopic Anatomy and Instructor in Electroencephalography
HARRY BARRON O'REAR, A.B. (Ala. '41), M.D. (Pa. '43)Medical College Associate Professor of Pediatrics
John Wood Reminston, B.S. (Charleston '31), M.S. (N.Y.U. '37), Ph.D. (N.Y.U.) '39)Medical College Associate Professor of Physiology
SAM ALLEN SINGAL, B.S. (Toledo '36), M.S. (Mich. '38), Ph.D. (Mich. '40)Medical College Associate Professor of Biochemistry and Research Fellow in Medicine
ASSOCIATE CLINICAL PROFESSORS
Stephen W. Brown, M.D. (L. S. U. '38),
*James Harvey Butler, M.D. (Ga. '14)S. F. C. Building Associate Professor of Clinical Medicine
ABE DAVIS, M.D. (Ga. '29)501 Greene Street Associate Professor of Clinical Public Health
JACK HEYMANN LEVY, M.D. (Ga. '36)1345 Greene Street Associate Professor of Clinical Radiology
Walter Eugene Matthews, M.D. (Ga. '30)
Henry Getzen Mealing, B.S. (Ga. '20), M.D., (Ga. '22)
WILLIAM H. ROBERTS, M.D. (Ga. '13)
Jules Victor Roule, Jr., M.D. (Ga. '26)
*Deceased, June 8, 1950.

WILLIAM V. WALSH, B.S. (Minn. '36), B.M. (Minn. '37), M.D. (Minn. '38)V.A. Hospita Associate Professor of Clinical Psychiatry and Neurology
GEORGE WASHINGTON WRIGHT, B.S. (Ga. '22), M.D. (Ga. '26)
ASSISTANT PROFESSORS
J. Bayard Britton, B.A. (Va. '45), M.D. (Va. '49)Medical Colleg Assistant Professor of Pharmacology
John Lidelle Chandler, B.A. (Ala. '37), M.D. (Ga. '41)University Hospita Assistant Professor of Orthopaedic Surgery
JAMES FRED DENTON, JR., B.S. (Ga. '35), M.S. (Ga. '38), Ph.D. (Rice Institute '41)Medical Colleg Assistant Professor of Medical Microbiology and Public Health
ROBERT GORDON ELLISON, A.B. (Vanderbilt '39), M.D. (Ga. '43)University Hospita Assistant Professor of Thoracic Surgery and Research Associate in Physiology
ALVA HUMPHREY FAULKNER, B.S. (Ga. '43), M.D. (Ga. '45)
CHARLES WILLIAM HOCK, M.D. (Duke '41)
Gordon McNeill Kelly, B.S. (Ga. '40), M.D. (Ga. '43)University Hospita Assistant Professor of Surgery
George R. Lacy, Jr., B.S. (Pittsburgh '42), M.D. (Pittsburgh '43)Medical Colleg Assistant Professor of Pathology
JOHN MILTON MARTIN, A.B. (Mercer '38), M.D. (Ga. '43)1445 Harper Street Assistant Professor of Medicine
HAIMS EGUDA NIEBURGS, M.D. (U. of Bologna '38)

CURTIS MANNING PHILLIPS, JR., B.S. (Ga. '40), M.D. (Ga. '43)Medical College Assistant Professor of Pathology
VIRGINIA LOUISE SYDOW, B.A. (R.M.W.C. '42), M.A. (Smith '44), Ph.D. (Hopkins '49)Medical College Assistant Professor of Pharmacology
CORBETT HILSMAN THIGPEN, A.B. (Mercer '42), M.D. (Ga. '45)
Aubrey Jackson Waters, B.S. (Ga. '32), M.S. (Ga. '35), Ph.D. (Wisc. '40), M.D. (Ga. '46)
WILLIAM ALBERT WILKES, M.D. (Ga. '37)Medical College Assistant Professor of Pediatrics
ASSISTANT CLINICAL PROFESSORS
WILLIAM S. BOYD, B.S. (Ga. '32), M.A. (Emory '34), M.D. (Ga. '42)
WILLIAM J. BURDASHAW, B.S. (Ga. '21), M.D. (Ga. '25)V. A. Hospital Assistant Professor of Clinical Psychiatry and Neurology
RAYMOND FRANCIS CORPE, M.D. (Ill. '40)Battey State Hospital Assistant Professor of Clinical Thoracic Surgery
DAVID E. FADER, A.B. (Kansas '32), M.D. (L. S. U. '36)V. A. Hospital Assistant Professor of Clinical Medicine
WILLIAM A. GARDNER, M.D. (Emory '12)V. A. Hospital Assistant Professor of Clinical Psychiatry and Neurology
John Emile Hummel, M.D. (Ga. '40)
Sam L. Hutchison, B.S. (Miss. '25), M.D. (Washington '27)
CLARENCE E. JUMP, B.S. (Mo. '27), M.D. (Washington '29)

Donald Roswell McRae, Jr., B.S. (Ga. '37), M.D. (Ga. '41)
Jule Cody Neal, Jr., B.S. Pharm. (Ga. '38), M.D. (Ga. '43)
JOHN THOMAS PERSALL, Jr., B.S. (Ga. '28), M.D. (Emory '33)
LOUIS Y. PESKOE, B.A. (Ohio State '33), M.D. (Buffalo '37)
HARRY D. PINSON, B.S. (Ga. '35), M.D. (Ga. '39)842 Greene Street Assistant Professor of Clinical Surgery
Walter Gamewell Watson, B.S. (Citadel '31), M.D. (Ga. '43)
MITCHELL WETHERHORN, B.S. (Fla. State U. '49), M.S. (Fla. State U. '49)Medical College Assistant Professor of Clinical Psychology
INSTRUCTORS
WILLIAM NICHOLAS AGOSTAS, M.D. (Ga. '47)University Hospital Instructor in Medicine
EDWARD C. Burns, Jr., M.D. (Emory '46)University Hospital Instructor in Radiology
*CHARLES IVERSON BRYANS, JR., B.S. (Ga. '40), M.D. (Ga. '43)
Guy L. Calk, B.S. (Citadel '47), M.D. (Emory '47)University Hospital Instructor in Obstetrics and Gynecology
Augustin Sturgis Carswell, B.S. (G. T. C. '40), M.D. (Ga. '45)
*On leave in Armed Forces.

ARTHUR BLEAKLEY CHANDLER, M.D. (Ga. '48)University Hospital Instructor in Pathology
Joe Bryan Chastain, B.S. (Ga. '44), M.D. (Ga. '48)
JOSEPHINE ROGERS ENGLER, R.N., B.S., Nursing (Vanderbilt '47)University Hospital Instructor in Pediatrics
*Theodore Everett, M.D. (Tulane '44)University Hospital Instructor in Urology
Elmer Lee Fry, B.S. (Ga. '48), M.D. (Ga. '45) University Hospital Instructor in Anesthesiology
SANGWILL L. GERNSTETTER, A.B. (Adelbert '40), M.D. (Ohio State '43)
WILLIAM FERGUSON HAMILTON, JR., B.A. (Ga. '42), M.D. (Ga. '45)
HENRY BRANHAM HEARN, III, M.D. (Ga. '47) University Hospital Instructor in Pediatrics
*Enon Chance Hopkins, A.B. (Emory '41), M.D. (Ga. '44)
LEONARD RUSH MASSENGALE, B.S. (Mercer '33), M.D. (Ga. '34)
JOSEPH LOUIS MULHERIN, B.S. (Ga. '42), M.D. (Ga. '44)
WILLIAM NELSON POPE, B.S. (Coll. of Charleston '38), M.D., (S. C. '40)
LEO HARBEN POU, JR., M.D. (Ga. '48)

Instructor in Anesthesiology

^{*}On leave in Armed Forces.

Herbert T. Ransdell, Jr., A.B. (Louisville '38), M.D. (Louisville '41)University Hospital Instructor in Thoracic Surgery
NINETTE PAYNE REEVES, M.D. (Ga. '48)
WARREN GILBERT SHUMAN, B.S. (Ga. '44), M.D. (Ga. '46) University Hospital Instructor in Urology
NEAL FRANKLIN YEOMANS, M. D. (Ga. '43)University Hospital Instructor in Radiology
CLINICAL INSTRUCTORS
THOMAS EDWARD BAILEY, M.D. (Ga. '39)Shirley Apts. Instructor in Clinical Pediatrics
THOMAS L. CLARY, JR., B.S. (Ga. '39), M.D. (Ga. '43)1345 Greene Street Instructor in Clinical Medicine
Paul George Goerner, A.B. (Carthage Coll. '38), M.D. (Iowa '43)
GILBERT LACY KLEMANN, A.B. (Williams '34), M.D. (Cornell '38)
Jules John McNerney, B.S. (St. Mary's U. '37), M.D. (L. S. U. '42)
ALEXANDER THOMAS MURPHEY, JR., M.D., (Ga. '48)University Hospital Instructor in Clinical Medicine
NATHAN REEVES, M.D. (Edinburgh '40)University Hospital Instructor in Clinical Medicine
LECTURERS
JOSEPH BRYAN CUMMING, Lit.D. (Princeton '15)Marion Building Lecturer in Forensic Medicine
ASSISTANTS
Albert Wright Bailey, M.D., (Ga. '49)University Hospital Assistant in Pathology

Ann Anderson Balley, A.B. (Agnes Scott '45), M.D. (Ga. '49)
Alfred Mann Battey, Jr., B.S. (Ga. '42), M.D. (Ga. '44)
James William Bennett, M.D. (Ga. '46)University Hospital Assistant in Pediatrics
Augustus Brown Boyd, B.S. (Ga. '44), M.D. (Ga. '48)
BETTY ANN BROOKS, B.A. (Agnes Scott '42), M.D. (Ga. '48)
WILLIAM RONALD BURDISON, B.S. (Tenn. '31), M.D. (Tenn. '33)
CHARLES WALTER COOLIDGE, M.D. (Ga. '46)University Hospital Assistant in Obstetrics and Gynecology
*ELLIS HOWARD DIXON, JR., B.S. (Ga. '45), M.D. (Ga. '47)
JOSEPH MARTIN ECHOLS, M.D. (Ga. '48) University Hospital Assistant in Obstetrics and Gynecology
JOHN ASA FAULKNER, JR., B.S. (Ga. '42), M.D. (Ga. '45)
LAWTON QUINBY HAIR, B.S., (S. C. '39), M.D. (Ga. '46)

OUTPATIENT DEPARTMENT

The Outpatient Department service is conducted by the faculty of the clinical departments of the Medical College and members of the Resident Staff of the University Hospital.

ANNOUNCEMENTS FOR 1950-1951

The one hundred and twenty-first session of the Medical College of Georgia began September 11, 1950, and will end June 4, 1951.

During World War II the school was on the accelerated program. From the beginning of this program in July 1942 classes were graduated every nine months; March 1943, December 1943, September 1944, June 1945, March 1946. The 1947 class graduated in March, and the 1948 class in March 1948. Beginning in 1949 classes will graduate only in June.

The Medical College of Georgia was originally chartered in 1828 as the Medical Academy of Georgia, with authority to confer the degree of Bachelor of Medicine. The following year the name of the institution was changed to the Medical Institute of the State of Georgia and its trustees were empowered to confer the degree of Doctor of Medicine. In 1833 the name was changed to the Medical College of Georgia.

In 1873, by mutual consent of respective Boards of Trustees, the Medical College of Georgia became affiliated with the University of Georgia as its Medical Department; and in 1911, by special enactment of the Legislature the University took possession of the property and assumed control of the management of its Medical Department.

The state-supported institutions of higher learning in Georgia were integrated into the University System of Georgia by legislative enactment at the regular session of the General Assembly in 1931. Under the articles of the Act all existent boards of trustees were abolished and control of the System vested in a board of regents which has all the power and rights of the former governing boards of the several institutions. Control of the System by the Board of Regents became effective January 1, 1932.

On July 1, 1933, the name of the institution was changed to the University of Georgia School of Medicine.

Following recommendations made by a special survey of the University System of Georgia, the Board of Regents of the University System on January 18, 1950, declared the medical school a separate and independent unit within the system, restored the name of Medical College of Georgia, and changed the title of the head of the school from Dean to President.

DISCIPLINE AND GENERAL REGULATIONS

The State of Georgia extends the privileges of the University System within the limits of its capacity to all persons who are qualified for admission. It is maintained at public expense for the public good. It cannot, however, be the patron of inefficiency, idleness, or dissipation. Its classes have no room except for those who diligently pursue the studies

of their choice and are willing to be governed in their conduct by the rules of propriety. Every student owes to the public a full equivalent of expenditures in his behalf, both while in the institution and afterward.

The discipline of the Medical College is in the hands of the President and the Executive Committee. Formal regulations are few and general in character.

Regulations are formulated and recommended by a Student-Faculty Council, which acts as an advisory body in student and faculty relations.

The Student-Faculty Council is composed of five Faculty members and nine students. The pre-clinical and clinical departments are each represented by at least two members of the Faculty. The Faculty members are elected by the student body for a term of three years. The students are represented by two members from each class together with the president of the Student Body. Two student members are elected by the first-year class in the first quarter and serve for a period of one scholastic year. Two permanent members are elected by the second-year class at the beginning of the scholastic year and serve until graduation. The committee meets three or four times a year—at least once each quarter. A chairman and secretary are elected by the committee for a term of one year.

MEDICAL COLLEGE BUILDINGS

The Medical College is housed in three buildings, situated on the College campus covering about forty-five acres. It is near the geographical center, and about one mile from the business center of Augusta, and is easily accessible by bus from all parts of the city.

The ground floor of the Newton Building provides quarters in the north end for the department of endocrinology and the Maternity Shelter, and in a portion of the south end for a dining room for the students known as the Alumni Tavern. The Mental Hygiene Clinic is also located on the ground floor. On the second floor are located the administration offices, the library and offices for some of the members of the clinical faculty. On the third floor are the departments of gross and microscopic anatomy. The fourth floor provides quarters for the department of animal surgery, with storage space for animals, student recreation rooms, the department of medical illustration and the ROTC office.

The Dugas Building, erected during the 1936-1937 session, houses the departments of physiology and pharmacology and the department of biochemistry, as well as an auditorium seating 358 persons. Funds for the erection of this building were provided by the Regents of the University System of Georgia and the Public Works Administration.

The Murphey Building houses the departments of pathology and medical

microbiology and public health. This building was occupied in September, 1939, and funds were provided from the same sources as for the Dugas Building.

Between 1941 and 1943 substantial additions were made to the Newton, Dugas and Murphey Buildings, in order to accommodate the increased enrollment. During 1950 additions are being made to the Dugas Building to provide space for the research program of the department of Physiology.

The former Wilhenford Hospital building has been converted for use as offices and laboratories for the Medical College and now houses the departments of psychiatry, oncology, clinical cytology and tuberculosis.

HOSPITALS

The City of Augusta, in 1914, completed upon the school grounds and in immediate proximity to the school building a hospital plant especially designed as a teaching hospital for the Medical College, and known as the University Hospital. The buildings, equipped, cost over a half million dollars. They are of modern fire-proof construction, and are furnished throughout with standard appliances of the best material and design. Of the total of 500 beds and bassinets, approximately 200 are available without restriction for teaching purposes.

In 1934, a two-story addition to the University Hospital, named the Milton Antony Wing after the founder of the Medical College, was completed. Funds for the erection of this building were contributed by the Federal Public Works Administration, the Alumni Association of the Medical College, the city of Augusta and the County of Richmond. The first floor of this building houses the out-patient department while the second floor is a contagious disease hospital.

The University Hospital is maintained by the City of Augusta. The exclusive medical and surgical care of free and staff patients in the Hospital is vested in the Medical College of Georgia. The attending staff which treats these patients is composed of the members of the faculty of the Medical College, thus assuring a proper use of the clinical material of the hospital for purposes of teaching.

In 1937 substantial additions and renovations were made to the University Hospital plant.

A two-story wing, with a maximum capacity of eighty-four beds, was added to the University Hospital on the western side in 1945.

The Georgia State School for Mentally Defective Children, which is operated by the State Board of Control, is located about eight miles from Augusta, and provides occasional demonstrations in the study of pediatric psychiatry.

Fourth-year students are assigned as ward clerks in medicine and psychiatry at the Veterans Administration Hospital. This hospital is approximately two miles from the campus of the Medical College.

CLINICAL OPPORTUNITIES

The Medical College has medical and surgical control of the charity patients of the City of Augusta. The Out-Patient Department of the University Hospital is housed on the first floor of the Milton Antony Wing of the Hospital and has an attendance averaging about one hundred and ten patients a day. A wealth of teaching material is derived from this source. Clinics are held daily by members of the out-patient staff.

Patients occupying free beds in the University Hospital are used as teaching material. Effective July 1, 1942, a state appropriation was made available for the free hospitalization of patients from outside Richmond County, especially from the rural counties of the state. This provides forty beds for teaching purposes. Hospital patients are examined by fourth-year students who record the physical and laboratory findings on the patients' charts. Hospital patients are also used for demonstrations in physical diagnosis in the second year.

A course in domiciliary medicine is given to the fourth-year students whose work in the patients' homes is directly supervised by special instructors employed for this purpose. The students examine these patients thoroughly and assist in their treatment which is supervised. This work is not only a source of great benefit to the student, but is also a great help to the patient, who in this way receives more thorough care than would otherwise be possible. It is unnecessary to emphasize the opportunity that the student has in this course to study medicine at the bed-side and to gain practical knowledge of the manner of handling patients in the home.

The Mental Hygiene Clinic, located on the ground floor of the Newton Building, is under the supervision of the Department of Psychiatry and Neurology of the Medical College and is supported by funds allocated by the State and Federal health services.

AUTOPSIES

The City Morgue with especially designed autopsy and cold storage room occupies space in the University Hospital. A new autopsy room has been provided in the Murphey Building. Students and Staff attend autopsies which are conducted by the staff in pathology. Approximately 150 autopsies are done annually.

LIBRARY

The Library is located in the south wing of the Newton Building, in quarters that afford retirement, ample room and good light. The Library is open from nine a. m. to six p. m., except Saturdays, when it closes at one p. m. Two full-time librarians are in charge. During the school session it is open five evenings a week under the supervision of a student assistant librarian.

During the 1940-1941 and 1941-1942 sessions the library was greatly improved by renovation and the inclusion of additional space, providing ample, well equipped quarters. Funds were made available through a legacy to the Medical College from Mrs. Julia Flournoy Moore, in honor of her father, Dr. Flournoy Carter, and known as the Moore-Carter Fund. A grant of ten thousand dollars from the Rockefeller Foundation made possible the addition of many books and bound copies of journals that were needed in order to fill out various incomplete volumes.

There are in the Library approximately 20,500 bound volumes. The list of books comprises many standard reference works in medicine and surgery and the fundamental sciences, as well as many of the latest text books and monographs. The library receives regularly over 300 current journals, in English, French and German, in the fields of chemistry, anatomy, physiology, pharmacology, bacteriology, pathology, medicine, surgery and allied subjects. The files of many of these journals are complete to date. The Library is maintained in part by appropriation from the general fund and in part by the income from the Library Endowment, a gift from the late Doctor William J. Young. The income from this endowment is used only for books and periodicals.

REQUIREMENTS FOR ADMISSION

The minimum requirements for admission to the Medical College are a four-year high school education, or its equivalent, and three years of work in a college included in the list of Approved Colleges of Arts and Sciences compiled by the Council on Medical Education and Hospitals of the American Medical Association.

The three years of college work shall comprise at least ninety semester hours, exclusive of military and physical education, extending through three sessions of thirty-two weeks each, exclusive of holidays, in an approved college. Where qualifications are equal, preference is given to applicants who have completed four years of college work.

The Medical College reserves the right to require more than the minimum hours here set down for admission.

SUGGESTIONS REGARDING INDIVIDUAL PREMEDICAL SUBJECTS

- (a) CHEMISTRY. Twelve semester hours required, of which at least eight semester hours must be in general inorganic chemistry, including four semester hours of laboratory work; and four semester hours in organic chemistry, including two semester hours of laboratory work. The course in organic chemistry should cover both the aliphatic and the aromatic compounds. In the interpretation of this rule, work in qualitative analysis may be counted as general inorganic chemistry. One course in quantitative analysis is also required.
- (b) Physics. Eight semester hours required, of which at least two must be laboratory work. It is urged that this course be preceded by a course in trigonometry.
- (c) Biology. Eight semester hours required, of which four should consist of laboratory work. This requirement may be satisfied by a course of eight semester hours in either general biology or zoology, or by courses of four semester hours in zoology and botany, but not by botany alone.
- (d) English Composition and Literature. The usual introductory college course of six semester hours, or its equivalent, is required.
- (e) Nonscience Subjects. Of the ninety semester hours required as the measurement of three years of college work, at least eighteen, including the six semester hours of English, should be in subjects other than the physical, chemical or biologic sciences.
- (f) Foreign Language. A reading knowledge of a modern foreign language is strongly urged. If the reading knowledge of this language is obtained on the basis of high school work, the student is urged to take another language in his college course.

SCHEDULE OF SUBJECTS OF THE THREE-YEAR PREMEDICAL COLLEGE COURSE.

NINETY SEMESTER HOURS* REQUIRED

THE DESIGNATION OF THE CONTROL OF TH	
	Semester
Required Subjects:	Hours
Chemistry (a)	12
Physics (b)	8
Biology (c)	
English composition and literature (d)	6
Other nonscience subjects (e)	12
Subjects Strongly Urged:	
A modern foreign language (f)	6-12
Advanced botany or advanced zoology	3-6
Additional courses in chemistry	3-6
Psychology and Logic	
Mathematics (algebra, trigonometry, analytical geometry,	
calculus)	3-6
Latin and Greek	3-6

^{*}A semester hour is the credit value of sixteen weeks work consisting of one lecture or recitation period per week, each period to be not less than fifty minutes net, at least two hours of laboratory work to be considered as the equivalent of one lecture or recitation period.

Other Suggested Electives:

English (additional), economics, history, sociology, political science, philosophy, and drawing.

(g) In General. This premedical course in both quantity and quality must be such as to make it acceptable as the equivalent of the first three years of the course leading to the degree of Bachelor of Science or Bachelor of Arts in an approved college of arts and sciences.

DEPARTMENT OF ADMISSIONS

All matters concerning admissions are in charge of the Department of Admissions. Inquiries concerning applications for admission are to be directed to the Executive Secretary, Department of Admissions, Medical College of Georgia, Augusta, Georgia.

Rules and regulations concerning admissions are formulated by the Committee on Admissions, which has the responsibility for decision upon applications for admission to the first, second and third year classes (admission to advanced standing in the fourth year is not permitted), and applications for places as irregular and special students.

Students and their parents and friends are discouraged from sending in, or having sent in, letters of recommendation from irrelevant sources, particularly from Federal and State Officers. Admission is strictly on a competitive basis and the democratic principle of equal rights to all and special privileges to none is rigidly enforced. Large numbers of recommendations usually indicate poor scholastic achievement or other deficiency in the qualifications of the applicant.

Applicants should study the application form and provide the information specified.

Physical examinations are required of all applicants. Personal interviews and supplementary tests may be required and appointments will be made by the Department of Admissions to suit the convenience of the applicant.

APPLICATIONS FOR ADMISSION

Students desiring admission will be furnished with proper blanks, together with instructions for filling them out. Application forms, when properly completed, should be returned to the Department of Admissions, Medical College of Georgia, Augusta. In conformity with the State law, all credentials are acted upon by the State Examiner.

Application for admission must be made not later than February first for the session opening the following September. If there are any vacancies, applications for advanced standing may be considered later than the time limit set for first-year students. The number of students accepted is limited. Preference is given to bona fide residents of Georgia. The Committee on Admissions considers the merits of each applicant with the utmost care. The following factors are taken into consideration in selecting from the list of applicants students for admission: scholarship, scores on the Medical College Admission Test, physical fitness, and information from references and personal interviews. The applicant is required to take the Medical College Admission Test (formerly called the Professional Aptitude Test) and information about the test may be secured from the Educational Testing Service, P. O. Box 592, Princeton, New Jersey. A certificate of satisfactory physical condition is also required.

Upon being notified of acceptance, the applicant must deposit twenty-five dollars with the school, as otherwise the place will not be held open to the exclusion of some other qualified applicant. This deposit will not be returned under any condition except serious illness or death, but will be credited on fees and deducted from the payment due when the student matriculates. Women are admitted on the same basis as men.

All communications should be addressed to the Department of Admissions, Medical College of Georgia, Augusta, Georgia.

ADMISSION TO ADVANCED STANDING

A student desiring admission to advanced standing is required to present satisfactory evidence that his preliminary and medical education is equivalent to that required of the class to which admission is sought. All high school and college credentials are passed upon in the same manner as those of the applicant for admission to the first year course. Students from accredited medical schools whose record of work is satisfactory may be admitted to advanced standing without examination, though the right of requiring examination is not waived. Students will not be received into any class unless there are vacancies.

With all applications for advanced standing the Committee on Admissions requires a statement from the Dean of the medical school previously attended indicating that the applicant is in good standing and eligible to continue at that school and recommending him for transfer. The Committee considers only those applicants who have clear records and whose comparative standing places them in the middle or upper third of their class. Students are not accepted for admission to the fourth-year class.

REQUIREMENTS FOR GRADUATION

A candidate for the degree of Doctor of Medicine from the Medical College of Georgia must be of good moral character and at least twentyone years of age. He must have successfully completed four years of medical study in accredited institutions, the last two years of which shall have been in this school. He must be free from indebtedness to the Medical College.

The Medical College reserves the right to require one year of Internship before award of degree of all students matriculating in or after September 1949.

LICENSING BOARD EXAMINATIONS

The members of the graduating class may take the examination given by the Georgia State Board of Medical Examiners shortly after Commencement. Examinations in the past have been held in Augusta and this arrangement will in all probability continue.

Under reciprocity agreements, thirty-six other states and the District of Columbia accept licentiates of the Georgia State Board of Medical Examiners.

Parts I and II of the National Board examinations are held under the auspices of the Medical College in Augusta. Part III has to be taken elsewhere. Part I covers the work of the first two years and Part II the work of the last two years in the Medical College. Part III consists of a practical examination after the satisfactory completion of an internship of one year.

Fees for the examinations of the National Board are as follows:

Part I and Registration	\$20.00
Part II	15.00
Part III, Admission fee\$10	0.00
Final Payment 30	0.00 \$40.00

The fee for Part III may be borrowed from the National Board of Medical Examiners on a note for one year.

The certificate of the National Board is recognized by the licensing authorities of forty-three states and four territories. It is also recognized by certain Federal services and by some foreign countries. Diplomates of the National Board are exempted from the scientific examination given by the American College of Surgeons and are admitted to the Mayo Foundation without taking the usual examination.

ALPHA OMEGA ALPHA

The medical honor fraternity, Alpha Omega Alpha, has established a chapter at the Medical College of Georgia. Students of the third and fourth year classes are approved for candidacy by the officers of the school and elections are made by the active members of the chapter.

IRREGULAR AND SPECIAL STUDENTS

An irregular student is a student who is pursuing work for a medical degree but who, for some special reason, is not following the regular curriculum of any one of the four classes in the Medical College.

A special student is one who is not pursuing work for any degree but who has been permitted to register for certain courses in the Medical College.

Those desiring to take particular courses may be registered as irregular or special students upon securing the approval of the Committee on Admissions and making satisfactory arrangements with the heads of the departments in which the work is to be done. Application must be made to the Committee on Admissions upon forms provided.

GRADUATE EDUCATION

The Committee on Graduate Education will review the qualifications and programs of candidates for the master's degree. Any student wishing to become a candidate for the master's degree should work through the head of one of the departments of the Medical College and should have his case presented by the head of that department. Application for admission must be made to the Committee on Admissions upon forms provided.

POST GRADUATE WORK

Graduates in medicine who desire to do post-graduate work may make the necessary arrangements for it with the President and the heads of the departments in which they wish to work. No fees will be charged individuals working in this manner. Fees will be charged only when formal post-graduate courses are offered.

FELLOWSHIPS

Research fellowships are offered. These fellowships vary in the departments from year to year. Candidates for these fellowships are required to have suitable prerequisite training.

EXAMINATION AND PROMOTION

Any student who by reason of a lack of sobriety, honesty or moral character manifests a distinct unfitness for the practice of medicine, will be required to withdraw from the school. Cheating in any form at any time will be punished with a minimum suspension from school for the remainder of the scholastic year, with failure in the course in question.

In order to be eligible for credit in major courses (those of seventy-two hours or more) the student must attend a minimum of eighty per cent of the class exercises of each course. Time lost by absences for any reason in major or minor courses must be made up to the satisfaction of the instructor in charge of the course.

Final examinations are held at the conclusion of the various courses. The examinations may come at the end of the first, second or third trimester, or at any time within a trimester that a course may be completed. No student shall leave the room during examinations. If he does so, he will be required to take a re-examination.

At the end of each school year there will be a meeting of the Promotion Boards to pass on the promotion of each individual student. Recommendations for degrees are made by the faculty as a whole.

The passing mark is 75 per cent. Any grade below 75 must be made up before promotion or graduation. The Promotion Board, with the consent of the department concerned, will specify whether the deficiency is to be made up by re-examination or by repetition of the course. The Promotion Board will also decide whether a student shall make up individual courses, repeat a whole year, or withdraw from school. No student will be allowed to repeat more than one year during the medical course for reason of scholastic difficulties.

In the exercise of their duties, the Promotion Boards are bound by the following regulations:

- I. No student with any failing grade may be considered for promotion if his weighted average grade for the year is below 77.0. Students repeating the year must have an average of 80.0 with no grade below 75.0.
- 2. No student may be allowed the privilege of re-examination in more than one major course if his deficiencies aggregate 21% or more of the year's work, or if, in the opinion of the Promotion Board, his record does not justify such privilege.
- 3. Any student whose weighted average grade is below 74.0 must withdraw without privilege of re-admission to the school.

REGISTRATION

Each student before beginning any class work is required to register. All credentials pertaining to entrance requirements must have been approved. Students will not be permitted to register later than two weeks after the opening of the session. First year students are required to register on the first day of the registration period. Any student accepted for admission to the first-year class who fails to report on the date set for first-year registration forfeits his place in the class.

Penalty Fee: A penalty fee of \$5.00 is charged students who register later than the regular registration day for the first trimester, or pay tees later than dates due at the beginning of the second and third trimesters.

TUITION AND FEES

In conformity with the regulations governing other units of the University System of Georgia, the Medical College does not require tuition fees of residents of the state.

Beginning with the 1950-51 session, the laboratory fees of residents of Georgia are \$390.00 per year, payable in three installments of \$130.00 each, at the beginning of each trimester.

The fees are \$690.00 per session or \$230.00 per trimester for non-residents.

Students attending college under the G. I. Bill of Rights will pay non-resident tuition in accordance with regulations of the Veterans Administration.

A breakage deposit is required of each student to cover possible injury to the property of the Medical College. The unused portion of this deposit is returned at the end of the college year. The breakage deposit for first-year students is \$20.00; for second, third and fourth-year students, \$15.00.

Payment of a health and student's activities fee of \$15.00 is required of each student.

Wives and children of medical students, who are domiciled with them, may be included in the student's hospitalization plan upon payment of a fee of \$5.00 for each such dependent. This fee is optional and is payable upon registration for the first quarter.

Upon graduation each student is charged a diploma fee of \$5.00.

All fees and other charges are subject to change at the end of each quarter.

This bulletin is published as a source of information only.

No statements herein are to be considered as a set of by-laws for the conduct of the school.

Statements published herein are subject to change without notice.

REFUND OF FEES

No refund of laboratory fees is made except on account of serious illness. A student withdrawing within four weeks after the beginning of any quarter, who secures from the President a statement of honorable standing and from a physician a certificate of inability to remain in attendance, is allowed a refund of one half of the payment due on fees at the time of registration, and all of any amount paid in advance on undue fees. No

refund is allowed a student who withdraws later than four weeks after the beginning of the quarter for which the fees were paid.

STUDENTS' AID

CHARLES McDonald Brown Scholarship Fund. This endowment was established in 1883, by the Hon. Joseph E. Brown, ex-Governor of Georgia, in memory of his son, Charles McDonald Brown, of the Class of 1878, for the purpose of aiding young men in defraying the expenses of their education. The interest on this fund is lent to worthy young men on condition that they obligate themselves to return it with four per cent interest.

By the rules and regulations for the administration of this fund, any student in the Medical College is eligible to participate in its benefit. A special circular of information concerning the fund and blank forms of application will be supplied on request. Applications for loans from this fund must be made on these forms and must be in the office of the Registrar of the Medical College two weeks before Commencement. A maximum of \$150.00 a year is allowed a borrowing student.

The Students Loan Fund, founded in 1926 by Dr. James Russell Howell of the class of that year, was begun for the purpose of assisting "deserving students in equipping themselves for the medical profession." Contributions to the fund consist of the unused portions of breakage fees deposited by members of the fourth year class, these unused portions being left by each graduating class as a memorial. The names of the students and the amount donated in this manner by each member of the class are duly placed on permanent record.

The income from the Eugene E. Murphey Fund, donated by Mr. Byron B. Taggart in honor of Dr. Murphey, is loaned to deserving students at a moderate rate of interest.

In 1942 and 1943, grants amounting to fifteen thousand dollars were made by the W. K. Kellogg Foundation for the purpose of aiding students, particularly those who would not be able to remain in school because of the cessation of the summer vacation under the accelerated program. This grant was accepted by the school and the amount has been loaned to students. It is expected that the Fund through repayments will be a permanent loan fund.

STUDENT EXPENSES

In addition to the fees payable to the college, from \$150.00 to \$200.00 a year is required to cover the cost of textbooks and instruments used by the student.

The housing shortage continues to be critical. Nevertheless students are

still finding accommodations in private homes and apartment houses. Approximately one-third of the students reside in fraternity chapter houses. The current average for room and board is approximately \$55.00 to \$65.00 a month.

There are no extra fees with the exception of the diploma fee.

RULES REGULATING STUDENT HEALTH SERVICE

A fee of \$15.00 is charged each student at the time of matriculation, and the proceeds from the fees paid by all students are used for student health service and student recreation facilities. It is hoped that a reserve for student health service can be built up over a period of years in order to make the regulations concerning the service more liberal. The following rules will govern the health service for the student body until further notice:

- I. The health service for each session will be in effect from the first day of matriculation until the day of graduation, and will not cover any days between sessions.
- 2. Hospitalization must be approved in each instance by the Professor of Medicine or the Professor of Surgery or their properly designated assistants.
- 3. Semi-private accommodations will be furnished for a total of 30 days in any school year. This is at the rate of \$7.00 a day in the University Hospital. Students desiring private accommodations must pay the difference.
- 4. Included in semi-private accommodations will be operating room charges, x-ray charges up to \$10.00, laboratory fees up to \$10.00, physical therapy up to \$10.00.
- 5. Students with positive tuberculin test may have chest plates made if authorized by the head of the Department of Tuberculosis.
- 6. Students not hospitalized may have x-ray, physical therapy or other diagnostic or therapeutic measures with proper authorization, within limits indicated in regulation Number 4.
 - 7. Special nursing service is not included.

Wives and children of medical students, who are domiciled with them, may be included in the student's hospitalization plan upon payment of a fee of \$5.00 for each such dependent. This premium positively cannot be paid after onset of illness. It must be paid at the beginning of the school year.

Hospitalization costs due to pregnancy and delivery will be covered pro-

vided the fee is paid at least nine months before the date of birth. Hospitalization will be provided for the new-born if the fee is paid three months prior to birth.

GENERAL PLAN OF INSTRUCTION

The regular course extends through four sessions of thirty-three weeks each. Each session is divided into three quarters of eleven weeks each, exclusive of holidays.

Beginning in July 1942 the Medical College adopted the accelerated program suggested by the Association of American Medical Colleges and a new session was begun approximately every nine months while the program lasted. Since 1945 all new classes have been started in September. In 1946 a three-months summer vacation was restored. Classes continued to graduate in March until 1948. The pre-war program has now been fully restored with all four classes entering in September and each graduation taking place in June.

The work of the first two years is devoted principally to a study of the fundamental sciences of biochemistry, anatomy, physiology, pharmacology, pathology and medical microbiology. The instruction is largely practical and most of the time is spent by the student in the laboratory, working under supervision. The laboratory work is supplemented by lectures, quizzes and conferences, which are designed to explain the fundamental principles of the subjects studied and to emphasize their relation to the study of medicine. In the second year clinical work is introduced by the courses in physical diagnosis, clinical pathology and surgery.

During the third year, in addition to attending lectures and demonstrations, the student spends a considerable part of his time in the medical and surgical clinics. Here, under supervision of the attending staff, he examines patients, prepares case records, makes diagnoses and outlines the indicated treatments.

In the fourth year, instruction is given almost wholly in the wards of the hospital, in the out-patient department, and in the course in domiciliary medicine in the patients' homes.

A detailed description of the work in the various years is given under the separate departmental announcements.

DEPARTMENTS

GROSS ANATOMY

Professors: G. L. KELLY, L. H. ALLEN

Instructors: W. S. Flanagin, J. E. Hummel, D. R. McRae, Jr.

The facilities of the department include two well-lighted dissecting rooms, with supply-room and embalming and storage-room for cadavers, a preparation room, lecture-room with projection apparatus, a museum of anatomical specimens, models and charts, an animal house with ample supply of laboratory animals, photographic and charting rooms and offices for the staff.

The required courses given by the department are designed (1) to enable the student to secure a comprehensive knowledge of the anatomy of the human body; (2) to develop in the student independence and initiative and the ability to make firsthand observations and records. The courses in gross, topographical and clinical anatomy are correlated with the work given in microscopic anatomy, surgery and medicine wherever practicable. Elective courses are offered for students who desire to extend their knowledge of anatomy beyond that obtained in the required courses, and for those wishing to undertake investigation of anatomical problems.

IOI. GROSS ANATOMY. The basis of this course consists of the dissection of the human body. This work is done under close personal supervision of the teaching staff and oral examinations are held at stated intervals. The use of the accessory techniques provided in the museum is encouraged. Radiographic studies of the normal are available to the student. Students are supplied with a set of bones for the study of osteology. In this latter course didactic hours are correlated with the dissection of the body. Students are required to draw the bones. For study of the individual bones of the skull, the students in groups use disarticulated skulls. First year, first trimester, 22 hours a week; second trimester, 20 hours a week; 462 hours. Professors Kelly, Allen and Drs. Flanagin, Hummel and McRae.

101A. CLINICAL ANATOMY. A new course to stimulate the interest of the student in gross anatomy. The demonstrations and lectures are given by clinical professors in the various specialties. The class sees lumbar and cisternal punctures, paracentesis thoracis and abdominis and like procedures and attends clinics on cases that are correlated with gross anatomy. First year, first 7 weeks of first trimester, I hour a week; 7 hours. Members of the clinical staffs.

201. TOPOGRAPHICAL AND CROSS-SECTION ANATOMY. The first half of

course is designed to lay the foundation for the application of the principles of physical diagnosis. The student learns, by lecture and laboratory work, to project upon the surface of the body the various underlying structures. In the second half of the course anatomical relations are taught by means of cross sections. The lecture series reviews the entire field of gross anatomy and emphasizes topics of special clinical importance. Second year, third trimester, 6 hours a week; didactic, 33 hours; laboratory, 33 hours. *Professor Allen* and *Staff*.

301. ADVANCED ANATOMY AND INVESTIGATION. To qualified students and graduates informal advanced courses in the different branches of anatomy are offered. During the third trimester opportunity for informal dissection of the infant as well as the adult is offered to interested workers. Registration and the payment of a laboratory fee ten days before the third trimester is required. Enrollment is limited.

Encouragement and opportunity are also given to students and others who have sufficient preparation to undertake the investigation of original problems in anatomy. A reading knowledge of French and German is essential. *Professors Kelly* and *Allen*.

MICROSCOPIC ANATOMY

Professors: L. L. Bowles, Chester H. Heuser Associate Professor: J. T. Manter

The courses given by this department are intended to help the student gain a working knowledge of microscopic anatomy. This includes normal microscopic structure, function, development, growth and differentiation of the human body. Also given is a course to acquaint the student with the methods of securing information from the current literature.

102. HISTOLOGY, human. Includes the study of cells, tissues and organs of the body. The didactic work consists of lectures, assigned reading, discussion and oral and written examinations. The laboratory time is used for study of prepared tissue sections and identification of unknown sections. First year, first trimester, 14 hours a week; class, 55 hours; laboratory, 99 hours. *Dr. Bowles* and *Staff*.

103. Embryology, human. Includes the study of maturation, fertilization, cleavage, formation of the germ layers, placentation, development of the external body form, histogenesis and organogenesis. Classroom lectures, discussion and examinations are correlated with the study in the laboratory of serial sections of pig and human embryos. First year, second trimester, 8 hours a week; class, 33 hours; laboratory, 55 hours. *Dr. Bowles* and *Staff*.

104. Neuro-Anatomy. The structure and function of the nervous system are studied by means of lectures supplemented by recitations and discussion. Laboratory studies include the dissection of the human brain as well as the identification of fiber tracts and cell groups in stained sections of the spinal cord and brain stem. First year, third trimester, 8 hours a week; lectures, 33 hours; laboratory, 55 hours. Dr. Manter and Staff.

105. BIBLIOGRAPHY. A series of conferences to acquaint the student with the use of the library and the methods of referring to the scientific and medical literature. First year, first trimester, I hour a week, II hours. The Anatomy and Library Staffs.

BIOCHEMISTRY

Professor: A. P. Briggs

Associate Professors: W. K. HALL, S. A. SINGAL

Research Fellow: S. J. HAZAN

Research Assistant: M. J. BLACKWELL

Courses in general inorganic chemistry, qualitative analysis, quantitative analysis, and organic chemistry are prerequisites for this work.

101. BIOCHEMISTRY. The first part of this course consists of a study of the chemical composition and reactions of the carbohydrates, lipids, proteins, and other substances of biological interest. The various tissues and fluids of the body are then studied, and considerable quantitative work is done on food, gastric juice, blood and urine. Nutrition and metabolism receive particular attention, and metabolism experiments are conducted by members of the class. Frequent references are made to current literature. First year, second trimester, 9 hours a week; third trimester, 15 hours a week; 264 hours. *Professors Briggs, Hall*, and *Singal*.

Advanced theoretical or practical courses in Biochemistry are offered by the staff to students, who, having had course 101 or its equivalent, wish to continue further the study of Biochemistry. Hours to be arranged.

In addition to the above courses, opportunity is given to qualified students to enter upon the investigation of new problems.

PHYSIOLOGY

/

Professor: W. F. Hamilton

Associate Professors: Philip Dow, J. W. Remington Research Associates: R. G. Ellison, R. W. Pickering Research Assistants: H. M. Caddell, A. R. Howard

IOI-20I. Physiology. In the lectures of this course the object is to acquaint the student with the more fundamental concepts of physiology and to consider in detail those portions of the subject that are essential to an understanding of the phenomena of health and disease in man. The laboratory exercises are planned to discipline the student in the method of experimentation as applied to the acquisition of physiological knowledge, and to give him first-hand experience with the principal types of experiments employed in the analysis of function.

Conferences and demonstrations supplement the more formal instruction.

First year, third trimester, 12 hours a week, 132 hours; second year, first trimester, 12 hours a week, 132 hours. Drs. Hamilton, Dow and Remington.

PHARMACOLOGY

Professor: R. P. AHLQUIST

Assistant Professors: J. Bayard Britton, Virginia L. Sydow Research Assistant: J. P. Taylor

201. Pharmacology and 'Toxicology. This course is designed to acquaint the student with the actions of drugs and certain toxic agents on the human body. The drugs studied are limited to those which have observable therapeutic effects. The lecture material, covering pharmacology, toxicology and posology, is supplemented by recitation periods and laboratory study.

The laboratory work is divided into two parts—animal experimentation to illustrate the pharmacological and toxicological actions of drugs, and clinical exercises consisting of observation periods in the hospital to illustrate the therapeutic uses of the important drugs.

The chief objective of the course is to encourage rational drug therapy in clinical practice.

Second year, second trimester, 19 hours per week; 209 hours. The Staff.

301. PHARMACOLOGY AND PRESCRIPTION WRITING. This course presents the fundamentals of modern drug usage and consists of a review of the

basic pharmacology of the newer and more important drugs, and a detailed presentation of posology, dosage form and prescription writing.

Third year, second trimester, 2 hours a week; 22 hours. Dr. Ahlquist.

PATHOLOGY

Professors: E. R. Pund, W. L. Shepeard

Assistant Professors: G. R. LACY, JR., C. M. PHILLIPS, JR.

Instructor: A. B. CHANDLER

Assistants: A. W. BAILEY, R. G. NEWTON, JR.

201. General Pathology, Morbid Anatomy and Histology. This is a course in the fundamental principles and processes of general pathology; the regressive changes, the progressive changes, including tumors, and inflammation. Because the study of pathology differs considerably from that of the other preclinical subjects, an attempt is made to conduct the course as an introduction into the clinical branches.

At the daily exercises a process is first explained and then illustrated by gross demonstration of selected specimens and by projection demonstration of microscopic slides. The slides are distributed for study and drawings are required.

The student is taught to regard the structural changes not as the whole of pathology, but rather as examples and illustrations of the effects of morbid processes. Functional changes are explained in lectures and are stressed in the recitations.

The museum is well supplied with selected and attractively preserved specimens. The microscopic slides are loaned from a collection. The course in General Pathology is continuous with the course in Special Pathology.

202. Special Pathology. A course in the disease of the systems, including Gynecological Pathology and Neuropathology.

The plan of the work is the same as in the course in General Pathology, to which indeed this course is directly complementary. Second year, first trimester, 6 hours a week, 66 hours; second trimester, 12 hours a week, 132 hours; third trimester, 9 hours a week, 99 hours. Total hours 207. Dr. Lacy and Dr. Phillips, assisted by the Staff.

Students of the second year class are required to attend Clinical Pathological Conferences one hour a week for 33 hours (See 401).

203. Necropsies. The necropsies are done in a specially equipped amphitheatre, which is conveniently located in the building of the Department of Pathology. The second-year class is required, and the third and fourth-year classes encouraged to attend. *The Staff*.

401. CLINICAL PATHOLOGICAL CONFERENCE. In cooperation with the clinical departments, conferences are held upon the cases which come to necropsy. That member of the fourth-year class to whom the case had been assigned in the hospital presents the clinical history. The case is discussed by a selected student of the fourth-year class and then by the head of the clinical department. The pathologist presents the finding of the necropsy and attempts to correlate his observations with the clinical course. Fourth year, I hour a week; 33 hours. The Staff.

Encouragement and opportunity are offered to qualified students to follow advanced work and to a few graduates to learn the common methods of investigation employed in research in pathology.

402. Surgical Pathology. Special stress is placed on fresh gross pathology and its correlation with the morbid histology. The students are taught to interpret the clinical course of a disease in the light of the pathologic evidence. Fresh surgical specimens are demonstrated. Subsequently, a student to whom the case was assigned, presents the history of the patient and describes the gross specimen. Projection demonstrations of the microscopic preparations complete the discussion. The microscopic preparations are issued to the group for further study. Fourth year, 1/3 of class, 3 hours a week; 33 hours. Repeated each trimester. Dr. Pund.

403. CLINICAL PATHOLOGICAL CANCER CONFERENCE. In cooperation with the Department of Oncology and with the resident staff of the University Hospital, conferences are held on cases of cancer selected from the surgical specimens of the Hospital and Cancer Clinic. A member of the resident staff presents the history; microscopic slides are projected and the case is discussed from the standpoint of diagnosis, treatment and prognosis. The gross specimen is presented to the students prior to the conference. Fourth year, 1/3 of class, 1 hour a week; 11 hours. Repeated each trimester. Dr. Pund and Dr. Wammock.

MEDICAL MICROBIOLOGY AND PUBLIC HEALTH

Professors: E. S. Sanderson, R. B. Dienst Associate Clinical Professor: Abe Davis Assistant Professor: J. F. Denton

Lecturers: Staff of State Department of Public Health

101. Introduction to Preventive Medicine and Public Health. An introductory course. Lectures will be supplemented by lantern slides and moving pictures. First year first trimester, I hour a week; II hours. Dr. Sanderson.

201. MEDICAL MICROBIOLOGY AND GENERAL IMMUNOLOGY. The course

is designed to familiarize students with the principles of microbiology with special emphasis on the organisms producing disease conditions in man, together with the application of measures for their control, and a discussion of the mechanism of infection and resistance. The disease producing properties of the commoner pathogenic micro-organisms, with methods for their cultivation, isolation and identification will be studied in the laboratory. The principal serologic methods of diagnosis will be carried out. Second year, first trimester, 16 hours a week; 176 hours. Drs. Dienst and Denton.

202. CLINICAL Parasitology. The course consists of lectures, motion pictures, demonstrations and laboratory studies of the animal parasites of man and their mode of transmission. The field of study covers protozoans, helminths and arthropods of medical importance. Second year, second trimester, 6 hours a week; 66 hours. *Drs. Denton* and *Dienst*.

301. Preventive Medicine. The course is designed to familiarize students, by lectures, motion pictures and field demonstrations, with modern health measures as exemplified in water purification, sewage disposal, mosquito control, dairy farm and milk plant sanitation, food processing, meat inspection, and industrial hazards. Major emphasis is placed upon disease prevention with attention to, and interest in, public and community health. Third year, one-third of class, 2 hours a week, 22 hours, repeated each trimester. Drs. Sanderson, Davis and members of Health Department Staff.

303. Public Health. The course is devoted to the study of city, county, state and federal health department organizations. Lectures on the health problems as related to the State of Georgia will be presented by members of the staff of the Georgia State Department of Health. Health problems such as tuberculosis control, cancer control, mental hygiene, venereal disease control and industrial hygiene are presented. An attempt is made to associate the medical and health problems with a social philosophy. Third year, third trimester, I hour a week; II hours. Dr. Sanderson and Heads of Divisions of State Health Department.

304-S. Public Health Summer Field Work. Through the facilities of the Regional Health Units of the State Department of Health and the Augusta-Richmond Health Department, practical training is offered to medical students during the summer following their third year. Students are assigned in groups for a period of one month, at stipends fixed by the State Health Department.

Beginning with the session 1951-1952 this summer program in Public Health constitutes a requirement of the medical school curriculum.

The Department of Medical Microbiology and Public Health is equipped for research and offers graduate students opportunities to undertake original investigative work.

MEDICINE

Professors: V. P. Sydenstricker (Chairman), W. L. Shepeard (Clinical Pathology)

Clinical Professors: W. J. Cranston, J. D. Gray, H. T. Harper, Jr., J. R. Kaufman, *F. L. Lee, D. R. Thomas, Jr.

Associate Professor: N. M. DEVAUGHN

Associate Clinical Professor: H. G. Mealing Assistant Professors: C. W. Hock, J. M. Martin

Assistant Clinical Professors: D. E. FADER, L. Y. PESKOE

Instructor: W. N. AGOSTAS

Clinical Instructors: T. L. Clary, Jr., P. G. Goerner, G. L. Klemann, J. J. McNerney, A. T. Murphey, Jr., Nathan Reeves.

Lecturer: Joseph B. Cumming

Assistants: L. Q. Hair, W. R. Burdison, J. W. Hirsch, Victor Moore, C. L. Pennington, E. D. Shanks, Jr., C. B. Shiver, F. B. Thigpen

Clinical Assistant: J. L. Lokey Research Fellow: S. A. SINGAL

Instruction in physical diagnosis and clinical pathology is begun in the second year; both subjects are taught largely by demonstration and practical exercises. Throughout the third year advanced work in physical diagnosis is given using selected cases from the abundant material of the out-patient department. During this year a comprehensive survey of medicine is given by means of a recitation course based on a standard text. Therapeutics is emphasized. In the fourth year two hours a week are devoted to clinical lectures and demonstrations, the great bulk of instruction being carried on at the bedside.

201. Physical Diagnosis. Recitations, demonstrations and practical exercises. Emphasis is laid on normal physical signs. Second year, ½ class, one-half year, 2 hours a week; entire class, third trimester, 2 hours a week; 55 hours. Dr. Martin, Dr. Clary, Dr. Reeves.

202. CLINICAL PATHOLOGY. Lectures and practical exercises covering the field in this subject. Standard methods are taught. Beginning with examination of the urine and blood, the course is continued to include all the usual laboratory procedures, blood chemical determinations and clinical bacteriology. The hospital furnishes an abundant supply of material. The student carries out all the procedures. Second year, third trimester, 9 hours a week; 99 hours. Drs. Shepeard, Mealing and Staff.

301. MEDICINE. A large part of general medicine is covered in this *On temporary leave from teaching.

course in recitations based on a standard text. Diseases that are frequently seen in the clinics are not emphasized here. Third year, first trimester, 3 hours a week; second trimester, 2 hours a week; 55 hours. Dr. DeVaughn.

- 302. CLINICAL MEDICINE. Practical instruction is given to small groups in the out-patient department, covering history taking, physical examination, diagnosis and treatment. The student is assigned a newly admitted patient, required to take a complete history and after examining the patient suggest therapy. All phases of this work are supervised. The follow-up of return cases is an important part of this work. Approximately 4,500 patients are admitted to the medical division of the out-patient department each year. Third year 1/3 of class, 8 hours a week; 88 hours. Repeated each trimester. Dr. Sydenstricker and Staff.
- 303. WARD ROUNDS. Ward Rounds for the third-year class are conducted three times a week. Third year, 1/3 of class, 3 hours a week; 33 hours. Repeated each trimester. Drs. Sydenstricker, Harper and Staff.
- 304. Gastro-Enterology. Didactic. Given in conjunction with departments of Surgery and Radiology. Third year, second trimester, I hour a week; II weeks. *Dr. Hock*.
- 401. APPLIED THERAPEUTICS. This course presents in detail the most important methods of treatment. Fourth year, second trimester, I hour a week; II hours. Dr. Martin.
- 402. MEDICAL CLINICS. Fourth year, 1 hour a week; 33 hours. Drs. Sydenstricker and Harper.
- 403. CLINICAL ALLERGY. Fourth year, first trimester, I hour a week; II hours. Dr. Thomas.
- 404. Gastro-Enterology. Didactic. Fourth year, second trimester, I hour a week; II hours. Dr. Hock.
- 404a. Gastro-Enterology. Out patient department. Fourth year, 1/6 of class, ½ trimester, 4 hours a week; 22 hours. Dr. Hock.
- 405. MEDICAL JURISPRUDENCE. A lecture course on the more important phases of this subject. Fourth year, second trimester, I hour a week; II hours. Mr. J. B. Cumming.
- 406. WARD ROUNDS AND WARD WORK. For a period of eleven weeks one-third of the members of the fourth-year class serve as clinical clerks on the medical wards. Each patient entering the wards is assigned to a student who records the history and physical findings and carries out the routine laboratory procedures. The students are required to attend ward rounds with visiting physicians daily and make notes on the patients' progress and on the therapeutic measures employed. Fourth year 1/3 of class, 6 hours a week; 66 hours. Repeated each trimester. Drs. Sydenstricker, Cranston, Gray, Harper and Thomas.

This course is supplemented by the assignment of a small group of students, on a rotation basis, as clinical clerks to the Medical Wards of the Veterans Administration Hospital (Dr. J. R. Kaufman and Staff)

- 407. Domiciliary Medicine. Under the supervision of members of the Staff fourth-year students attend the sick poor in their homes in one district of the city. History, physical examination and laboratory examinations are made and recorded and daily visits paid, each case being followed to its completion. There are daily conferences where the instructor meets the group of students and a history meeting is held once a week. One-third of the fourth-year class is assigned to this work for one trimester. Dr. Agostas and Staff.
- 408. MEDICAL APPLICATIONS OF RADIOISOTOPES. This course will consist of lectures on the fundamental principles of nuclear physics and radiochemistry. This will serve as a background for the remaining lectures on the biological and medical application of isotopes in tracer technique and in the therapy and diagnosis of disease. Fourth year, second trimester, I hour a week, II hours. *Drs. Singal, Hamilton* and *Brown*.
- 409. DIABETIC CLINIC. Fourth year, 1/3 of class, I hour a week; II hours. Repeated each trimester. Drs. DeVaughn and Gray.
- 410. CARDIAC CLINIC. Fourth year, 1/3 of class, 2 hours a week; 22 hours. Repeated each trimester. Drs. Cranston, Harper and Staff.
- 411. CLINICAL PATHOLOGICAL CONFERENCE. Clinical and autopsy findings are compared and correlated. The histories and material are from the hospital. For scheduled hours see Pathology 401.
- 412. CARDIOLOGY. Electrocardiography. Fourth year, third trimester, I hour a week; II hours. Dr. Harper.

TUBERCULOSIS

Specialized instruction in tuberculosis begins in the third trimester of the third year with a lecture course on the fundamentals of the disease. In the fourth year the work is entirely clinical. Modern, approved methods of diagnosis and treatment, including surgical collapses, are stressed.

Selective cases in the hospital are used for clinical clerkships during the fourth year. Advanced students are afforded the opportunity to become proficient in diagnostic and therapeutic methods including the various collapse procedures. Close affiliation with the Department of Thoracic Surgery is maintained.

301. Tuberculosis Lectures. Third year, entire class, third trimester, I hour a week; II hours. Medical Resident and Staff.

- 401. Tuberculosis Clinics. Fourth year, 1/3 of class, 2 hours a week: 11 hours. Repeated each trimester. Medical Resident and Staff.
- 402. Collapse Therapy. Fourth year, 1/3 of class, 1 hour a week; 11 hours. Repeated each trimester. Medical Resident and Staff.
- 403. MEDICAL-SURGICAL CONFERENCE. Elective. 2 hours a week; 22 hours. Repeated each trimester. Medical Resident and Staff.
- 404. OPERATIVE CLINICS. Surgical procedures indicated in the treatment of tuberculosis pulmonary conditions are demonstrated. For details see Thoracic Surgery 401.

HISTORY OF MEDICINE

101. HISTORY OF MEDICINE. This course consists of formal lectures on the history of the development of medicine in its broader aspects. Part of the course is devoted to the history of medicine as it developed in the colony and state of Georgia. First year, third trimester, I hour a week; II hours. Dr. Kelly.

DERMATOLOGY AND SYPHILOLOGY

Professor: J. Malcolm Bazemore. Instructor: *Enon C. Hopkins

- 301. Dermatology and Syphilology. A recitation and lecture course based on a standard textbook. Third year, I hour a week, third trimester; II hours. *Dr. Bazemore*.
- 302. CLINICAL DERMATOLOGY. A course in practical instruction in the diagnosis and treatment of dermatological diseases, given in the out-patient department. Third year, 1/6 of class, ½ of trimester, 2 hours a week; II hours. Repeated twice each trimester. Dr. Bazemore.
- 401. DERMATOLOGY. Didactic. Fourth year, first trimester, I hour a week; II hours. Dr. Bazemore.
- 402. SYPHILIS CLINIC. Practical instruction in diagnosis and treatment of syphilis given in the out-patient department. Fourth year, 1/6 of class, ½ of trimester, 2 hours a week; 11 hours. Repeated twice each trimester. The Staff.

Interns and residents are instructed in clinics and ward rounds.

*On leave in Armed Forces.

PSYCHIATRY AND NEUROLOGY

Professor: H. M. CLECKLEY
Clinical Professor: Leo R. Tighe
Associate Clinical Professor: William V. Walsh
Assistant Professor: Corbett H. Thigpen
Assistant Clinical Professors: W. J. Burdashaw,
W. A. Gardner, S. L. Hutchison, C. E. Jump
Instructors: J. T. Manter (Electroencephalography),
Nimette Reeves

Administrative Officer of Mental Hygiene Clinic; Assistant Professor of Clinical Psychology: MITCHELL WETHERHORN

- IOI. PSYCHOBIOLOGY. A recitation and lecture course in which the common psychopathological processes which underlie mental disorder are considered with especial reference to the personality as a whole. An effort is made to keep in view the general principles of normal psychobiological functioning and their close relation to morbid personality reactions. First year, I hour a week; 27 hours. Dr. Thigpen.
- 301. Neurology. A recitation and lecture course on organic diseases of the nervous system. Third year, second trimester, I hour a week; II hours. See also Neurologic Surgery 301. Drs. Cleckley and Thigpen.
- 302. CLINICAL NEUROPSYCHIATRY. Practical instruction given to small groups (14 students) in the Outpatient Clinic. Instruction includes psychiatric and neurological examination and treatment. Third year, 1/6 of class, ½ trimester, 11 hours. Drs. Cleckley and Thigpen.
- 401. PSYCHIATRY. A lecture and recitation course outlining the more important mental diseases and the psychoneuroses, with clinical demonstrations and lectures by visiting psychiatrists. Each student makes a complete psychiatric study and writes the history and examination on patients. Clinical clerkships are served in the University Hospital and the Veterans Administration Hospital. Abundant clinical material is available and students are supervised in their work as clinical clerks in each institution. The class spends three days at the Georgia State Hospital, at Milledgeville, studying cases and attending clinics under the direction of the staff. Specific instruction in psychologic testing is given. The significance of the Rorschach Test, the Thematic Apperception Test, the Minnesota Multiphasic Test, as well as ordinary intelligence tests, is discussed. Fourth year, 2 hours a week; 66 hours. Dr. Cleckley and Staff.
- 403. Clinical demonstrations and lectures at Veterans Administration Hospital. 12 hours. Clinical Staff.

PEDIATRICS

Associate Professor: HARRY B. O'REAR (Head of

Department)

Clinical Professors: P. A. MULHERIN, R. C. McGAHEE

Assistant Professor: W. A. WILKES

Instructors: J. B. CHASTAIN, JOSEPHINE R. ENGLER

H. B. HEARN, III, L. R. MASSENGALE

Clinical Instructor: T. E. BAILEY

Assistants: Ann A. Bailey, James Bennett, L. K.

Newlin, Jr., Theo G. Thevaos

- 301. Physical Diagnosis, and Growth and Development. II hours. Repeated each trimester. *Drs. Wilkes* and *O'Rear*.
- 302. Infant Nutrition, Feeding and Hygiene. 11 hours. Repeated each trimester. Drs. Massengale and O'Rear.
- 303. Practical Pediatrics. Demonstrations of nursing procedures important in the practice of Pediatrics, and two hours a day for one week are spent in the formula preparation laboratory. 18 hours. Repeated each trimester. *Mrs. Engler* and *Nursing Staff*.
 - 304. WARD ROUNDS. 22 hours. Dr. O'Rear and Staff.
 - 305. WARD WORK. 81 hours. Repeated each trimester. Dr. O'Rear.
- 401. Domiciliary Pediatrics. Under the supervision of the Pediatric Staff, fourth-year students attend sick infants and children in their homes in one district of the city. Domiciliary pediatrics is conducted in cooperation with Domiciliary Medicine. 88 hours. Repeated each trimester. Pediatric Staff.
- 402. CLINICAL CLERKSHIP. The clinical clerkship consists of work on the pediatric wards and in the outpatient department.
- 403. PEDIATRIC CLINICS. Held once a week throughout the school year. 33 hours. Drs. Mulherin and McGahee.
- 404. Premature Care. Students are assigned two or three at a time to work in the premature nursery under the supervision of the pediatric and nursing staff.

Graduate Training. Interns are assigned to the Pediatric Service for a period of six weeks during which time they work on the Pediatric wards and nurseries. The Pediatric Department of the University Hospital has a two-year residency training program. During the period of the residency, residents are assigned in rotation to the following pediatric services: Premature and Newborn Nurseries; Outpatient Clinic; Well Baby Clinic (conducted in co-operation with the Richmond County Health Department); Pediatric Wards (includes the Contagious Unit); and Domiciliary Pediatrics. Rotation through the Clinical Laboratory will be begun upon

completion of the laboratory wing of the University Hospital. Pediatric conferences for the housestaff are held twice weekly.

SURGERY

Professors: J. H. Sherman, Chairman, *R. C. Major. (Thoracic Surgery), J. R. Rinker (Urology), W. A Risteen (Neurologic Surgery), P. P. Volpitto (Anesthesiology), P. B. Wright (Orthopaedic Surgery)

Clinical Professors: W. W. Battey, G. T. Bernard (Cancer Surgery), R. H. Chaney, R. L. Rhodes

Associate Professors: *J. B. Bowen, D. A. Davis (Anesthesiology), W. S. Flanagin (Plastic Surgery), G. F. Jones, Jr.

Associate Clinical Professors: W. E. MATTHEWS
(Ophthalmology, Otolaryngology), J. V. Roule, Jr.
(Ophthalmology, Otolarynology), W. H. Roberts
(Cancer Surgery), G. W. Wright (Cancer Surgery)

Assistant Professors: J. L. CHANDLER (Orthopacdic Surgery), R. G. ELLISON (Thoracic Surgery), G. M. KELLY, A. J. WATERS (Anesthesiology)

Assistant Clinical Professors: R. F. CORPE (Thoracic Surgery), J. E. HUMMEL, D. R. MCRAE, JR., H. D. PINSON

Instructors: A. S. Carswell (Orthopaedic Surgery),

*T. Everett (Urology), E. L. Fry (Anesthesiology),
S. L. Gernstetter (Orthopaedic Surgery), J. L.

Mulherin, W. N. Pope, L. H. Pou, Jr.,
(Anesthesiology), H. T. Ransbell, Jr. (Thoracic
Surgery), W. G. Shuman (Urology)

Assistants: A. M. Battey, Jr., A. B. Boyd (Anesthesiology), J. A. FAULKNER, (Orthopaedic Surgery), R. B. Hargrove, Jr., J. B. Kay, Jr., (Urology), R. A. Matthew (Anesthesiology), C. S. Mulherin, *B. C. Newsom, C. A. White, Jr., J. P. Wilson

Clinical Assistants: H. R. Perkins (Ophthalmology, Otolaryngology), W. A. Steed, (Ophthalmology, Otolaryngology)

Physical Therapist: Loretta Fahey (Orthopaedic Surgery)

*On leave in Armed Forces.

SURGERY

- 202. Physical Diagnosis in Surgery. Lectures, demonstrations and Examinations of hospital patients. Second year. ½ class, ½ year, 2 hours week, 33 hours.
- 202. Introduction to Surgery. Lectures and demonstrations emphasizing the basic aspects of surgery. Second year. I hour week, third trimester, II hours.
- 301. PRINCIPLES OF SURGERY. Lectures and demonstrations covering the more important subjects in general surgery. The course continues in the second trimester in conjunction with the course in Gastro-enterology (Medicine 304) Third year. 2 hours week, first trimester; 22 hours.
- 302. Surgical Technique. A laboratory course with the students performing standard operations on anesthetized animals. Third year, 1/3 of class, 6 hours week, one trimester, 66 hours.
- 303. CLINICAL SURGERY. The students are assigned patients in the hospital for clinical clerkship training and attend the outpatient clinic of general surgery. There are frequent informal ward rounds and conferences with regularly scheduled formal bedside clinics. Third year, 1/3 of class, 21 hours week, one trimester, 231 hours.
- 401. CLINICAL SURGERY. Students are assigned hospital patients from both the general surgery service and the surgical specialties. Frequent ward rounds and conferences are held. The students are also assigned, in rotation, to services in the operating rooms, accident rooms and on anesthesia. Fourth year, 1/3 class, 22 hours week, one trimester, 242 hours (not including emergency calls).

GRADUATE TRAINING. The department, in affiliation with the University Hospital, offers a four-year residency training program in general surgery. A minimum of one year internship is a prerequisite.

ANESTHESIOLOGY

- 201. Introduction to Anesthesiology. A brief outline of agents employed, with theories, stages and signs of anesthesia. The course is a part of Pharmacology 201. Second year, entire class, second trimester, 4 hours.
- 202. PRINCIPLES OF ANESTHESIOLOGY. A course of lectures covering the principles of inhalation, regional, rectal and intravenous anesthesia. Second year, entire class, third trimester, I hour week, II hours.
- 301. Practical Anesthesiology. A practical course given in conjunction with Surgical Technique 302. Third year, 1/3 of class, 6 hours week, one trimester, 66 hours.

- 401. Principles of Clinical Anesthesiology. A course of lectures covering the clinical application of anesthetic agents. Fourth year, entire class, third trimester, I hour week, II hours.
- 402. CLINICAL ANESTHESIOLOGY. A practical course in conjunction with Clinical Surgery 401, with the student observing and participating in the conduct of anesthesia in the operating rooms. Fourth year, 1/3 of class, one trimester.

Graduate Training. The department, in affiliation with the University Hospital, offers a two-year residency training program in anesthesiology. A minimum of one year internship is a prerequisite.

CLINICAL CANCER

401. CANCER CONFERENCE. A part of Clinical Surgery 401. Fourth year, 1/3 of class, one hour week, one trimester.

NEUROLOGIC SURGERY

- 201. Neurologic Physical Diagnosis. Instructions and clinical demonstrations in the principles of neurologic diagnosis. Second year, entire class, third trimester, 2 hours week, 22 hours.
- 301. Principles of Neurologic Surgery. Lectures, demonstrations and discussions, given in conjunction with Neurology 301. Third year, entire class, third trimester, I hour week, ½ trimester, 5 hours.
- 302. CLINICAL NEUROLOGIC SURGERY. Scheduled with Neuropsychiatry 302. Third year, 1/3 of class, one trimester.
- 401. CLINICAL NEUROLOGIC SURGERY. Ward rounds, conferences and operative clinics. The course is part of Clinical Surgery 401. Fourth year, 1/3 of class, one trimester.

OPHTHALMOLOGY AND OTOLARYNGOLOGY

- 301. PRINCIPLES OF OPHTHALMOLOGY AND OTOLARYNGOLOGY. Lectures, discussions and demonstrations. Third year, entire class, third trimester, I hour week, II hours.
- 401. OUTPATIENT CLINIC. Fourth year, 1/6 class, ½ trimester, 4 hours week, 22 hours.
- 402. CLINICAL OPHTHALMOLOGY AND OTOLARYNGOLOGY. Ward rounds, conferences and operative clinics. The course is part of Clinical Surgery 401. Fourth year, 1/3 class, one trimester.

ORTHOPAEDIC SURGERY

- 301. PRINCIPLES OF ORTHOPAEDIC SURGERY. Lectures and recitations. Third year, entire class, first and second trimesters, 17 hours.
- 401. CLINICAL ORTHOPAEDIC SURGERY. Ward rounds, conferences and operative clinics. The course is part of Clinical Surgery 401. Fourth year, 1/3 class, one trimester.
- 402. OUTPATIENT CLINIC. Fourth year, 1/6 class, ½ trimester, 4 hours week, 22 hours.
- 403. Fracture Clinic. A follow-up clinic for fractures. Fourth year, 1/6 class, ½ trimester, 2 hours week, 11 hours.
- 404. Principles of Fractures. A didactic and practical demonstration course. Fourth year, entire class, first and second trimester, 22 hours.

Graduate Training. The department, in affiliation with the University Hospital, offers a three-year residency training program in orthopaedic surgery. A minimum of one year internship is a prerequisite.

PLASTIC SURGERY

- 301. PRINCIPLES OF PLASTIC SURGERY. Lectures and demonstrations given in conjunction with Principles of Surgery 301. Third year, entire class.
- 401. CLINICAL PLASTIC SURGERY. Ward rounds, conferences and operative clinics. The course is part of Clinical Surgery 401. Fourth year, 1/3 class, one trimester.

THORACIC SURGERY

- 301. PRINCIPLES OF THORACIC SURGERY. Lectures, recitations and demonstrations. Third year, entire class, third trimester, 1 hour week, ½ trimester, 6 hours.
- 401. CLINICAL THORACIC SURGERY. Ward rounds, conferences and operative clinics. The course is part of Clinical Surgery 401. Fourth year, 1/3 class, one trimester.

Graduate Training. The department, in affiliation with the University Hospital and Battey State Hospital, offers a two-year residency training program in thoracic surgery. A minimum of one year internship and three years training in general surgery are prerequisites.

UROLOGY

301. PRINCIPLES OF UROLOGY. A systematic lecture and recitation course. Third year, entire class, second and third trimesters, 16 hours.

401. CLINICAL UROLOGY. Ward rounds, conferences and operative clinics. The course is part of Clinical Surgery 401. Fourth year, 1/3 class, one trimester.

402. OUTPATIENT CLINIC. Fourth year 1/6 class, ½ trimester, 6 hours week, 33 hours.

Graduate Training. The department, in affiliation with the University Hospital, offers a three-year residency training program in urology. A minimum of one year internship is a prerequisite.

RADIOLOGY

Clinical Professor: L. P. Holmes

Associate Clinical Professors: S. W. Brown, J. H. Levy

Instructors: E. C. Burns, Jr., W. F. Hamilton, Jr.,

N. F. YEOMANS

Assistant: T. F. JACKSON

Instruction is given in diagnostic roentgenology, roentgen therapy, radium therapy, isotope therapy, and the basic physics of radiology. Given in conjunction with courses listed in the departments of Medicine and Surgery for third and fourth year students.

ONCOLOGY

Professor: Hoke Wammock

This course is designed to acquaint the students with the cancer problem in all its phases, including research, diagnostic procedures, pathological and x-ray interpretation, therapeutic procedures, and finally the care of the incurable case.

This course is integrated within the various departments of the Medical College. During the first and second years, students receive instruction in the theories of growth, host reactions, carcinogenic agents, genetics and biochemical and biophysical factors as related to cancer.

301. Oncology. A series of lectures and demonstrations is given, reviewing the progress of research, diagnostic and therapeutic procedures, and methods of cancer control. Students are assigned patients on the wards. Third year, one hour per week, 33 hours.

The course of instruction is continued in the fourth year with a Surgical Pathological Conference in cooperation with the Department of Pathology. Students also attend the Cancer Conference one hour per week, one third of class each trimester. Further instruction is continued through ward rounds and other conferences.

OBSTETRICS AND GYNECOLOGY

Professor: RICHARD TORPIN

Assistant Professor: A. H. FAULKNER

Assistant Clinical Professors: W. S. Boyd, §J. C.

NEAL, JR., J. T. PERSALL, JR., W. G. WATSON

Instructors: *C. I. BRYANS, JR., G. L. CALK

Assistants: B. A. Brooks, C. W. Coolidge, *E. H.

DIXON, JR., J. M. ECHOLS, D. HAMMOND, P. F.

HOLCOMB, H. G. JARRELL, J. L. KING, JR.

R. L. Lanier, Jr.

The courses have been arranged to impart a fundamental knowledge of the anatomy, physiology and pathology, and of the principles of diagnosis and treatment in obstetrics and gynecology. Every effort is made to correlate the two branches.

301. Obstetrics. Lecture recitations and manikin demonstrations on the physiology of pregnancy and labor. Third year, I hour a week; 33 hours. Dr. Watson.

301-a. Principles of Gynecology. A recitation and lecture course in the principles and practice of gynecology. Third year, I hour a week for the entire year; 33 hours. Dr. Boyd.

302. Obstetrical Clerkship. During the third year each student is assigned from eight to ten cases for complete history, physical examination, and laboratory work, followed by attendance of the case while in the hospital, including assistance at delivery. The student records his observations of delivery and is quizzed about each case. *Drs. Torpin, Persall* and *Staff*.

303. OUT-PATIENT PRENATAL CLINIC. Students in the third year class are divided into groups of six and are in attendance three afternoons per week for five and one-half weeks. Practice is afforded in history taking, abdominal examination, auscultation and pelvimetry. Many pathological conditions are found and discussed. Third year, 1/6 of class, ½ trimester, 6 hours a week; 33 hours. Repeated twice each trimester. Drs. Torpin, Faulkner and Staff.

305. Fertility and Contraceptive Clinic. This enables the student to become familiar with contraceptive methods as demonstrated in the outpatient department. Third year, groups of four. The clinic is held on Thursdays from 2:30-4:00 p.m. Dr. Boyd.

401. Lectures and Clinics on Pathological Obstetrics. Ward cases in the hospital are used for this course. Fourth year, I hour a week; 33 hours. Dr. Faulkner.

402. MATERNITY SHELTER. At some time during the latter part of the Junior year or during the Senior year, each student spends approximately \$Macon, Ga.

*On leave in Armed Forces.

eighteen days on this service where some four hundred and fifty women are delivered annually. Four students are on duty at a time, in shifts of two, beginning at staggered intervals. They examine all patients on admission, follow them through labor and make the delivery under the supervision of a member of the hospital resident staff. If no complications arise, these patients are dismissed a few hours post partum and the students are required to make post partum calls during the puerperal period.

402-a. WARD ROUNDS. Presentation of gynecological conditions both pre- and post-operatively, together with ample opportunity for the student to examine the patients. Fourth year, 1/3 of class, 2 hours a week; 22 hours. Repeated each trimester. Dr. Torpin and Resident Staff.

403. OPERATIVE OBSTETRICS. Throughout the year arrangements are made whereby students are allowed to attend certain major operations. Dr. Torpin and Staff.

404. OPERATIVE GYNECOLOGY. This course allows the student to become familiar with the different operative procedures most common in gynecological surgery. One student is allowed to assist with each operation, the remainder of the group observing. Fourth year, 1/3 of class, I hour a week; II hours. Repeated each trimester. Drs. Torpin, Faulkner and Persall.

405. ADVANCED GYNECOLOGY. This course is designed to refresh the student's knowledge of the surgical pathology attendant upon gynecological and obstetrical conditions. The course includes demonstrations of gross pathology. Fourth year, I hour a week; 33 hours. *Dr. Persall.*

406. CLINICAL GYNECOLOGY. Opportunity is afforded the student for diagnosis and treatment of ambulatory gynecological conditions seen in the out-patient department. This course includes one afternoon devoted to postoperative gynecologic clinic and to the granuloma clinic; also one afternoon in the gynecologic endocrine clinic. Fourth year, 1/6 of class, ½ trimester, 4½ hours a week; 25 hours. Repeated each trimester. Drs. Torpin, Persall and Staff.

ENDOCRINOLOGY

Professor: R. B. Greenblatt Research Fellow: W. E. Barfield

Research Assistants: Nelson Brown, Sarah Clark,

ROBFRT WEST

The department aims to cooperate with the other departments for the experimental and clinical investigation of problems in endocrinology. Facilities for laboratory endocrinology and animal experimentation are maintained. Particular stress is directed toward investigations in experimental gynecology and endocrinology.

301. Endocrinology. A didactic course in endocrinology. The second

trimester will be devoted to medical aspects of endocrinology; the third trimester to sex-endocrinology. Third year, second and third trimesters, I hour a week; 22 hours. *Dr. Greenblatt*.

- 401. Special Endocrinology. A course in which the various syndromes in endocrinology are correlated with the pathologic changes in the glands of internal secretion, such as the pituitary, thyroid, adrenals, ovaries, testes, etc. Fourth year, first trimester, I hour a week; II hours. Dr. Greenblatt.
- 402. Endocrine Clinic. A clinic for the study and treatment of endocrine disorders in which the student assists in diagnosis and treatment. Practical demonstrations also are given in the management of infertility by demonstrating such procedures as the Huhner test, the Rubin test, uterosalpingography, suction curettage, etc. Fourth year, 1/6 of class, Thursdays, 2-3:30 p.m.; 9 hours. Dr. Greenblatt.
- 501. Post Graduate Course in Endocrinology. A refresher course for the practicing physician given by arrangement. Dr. Greenblatt.

Course in Endocrinology to Resident Staff University Hospital. Tuesday evening, 1 hour, for 8 hours.

CLINICAL CYTOLOGY

Assistant Professor: H. E. NIEBURGS
Research Associate: D. C. WILLIAMS
Research Assistant: S. Bamford

CANCER DETECTION: A controlled program of preventive oncology is conducted by this department. It is intended to serve as a center for cancer detection and diagnosis by exfoliative cytology to the hospital, clinics and practicing physicians. Aid is offered to other departments in cancer diagnosis by additional investigative procedures such as chemical and bio-assays.

RESEARCH: An extensive program of clinical and animal research is being carried out in the fields of cytology, tissue culture technics for cancer diagnosis, semeiology, carcinogenesis and therapy. Opportunity is given to qualified students and physicians to participate in any phase of cancer research.

FELLOWSHIPS: In addition to the teaching of exfoliative cytology, the American Cancer Society offers fellowships to qualified physicians for training in this department.

POSTGRADUATE SYMPOSIUM IN EXFOLIATIVE CYTOLOGY AND CANCER DIAGNOSIS: A series of coordinated lectures on recent advances in cancer detection and diagnosis is given once a year by arrangement to pathologists, practicing physicians and technicians.

MEDICAL ILLUSTRATION

Professor and Director of Illustration: O. A. Parkes Medical Photographer and Instructor in Photography: H. E. Wood, Jr.

Assistants: Mary P. Hallinan (Medical Illustration),
VIRGINIA DIXON (Medical Photography)

PRECLINICAL PROFESSORS IN MEDICAL ILLUSTRATION:

Professors: L. H. Allen (Gross Anatomy), L. L. Bowles (Microscopic Anatomy), E. R. Pund (Pathology)

Associate Professor: J. T. Manter (Microscopic Anatomy)

A. Courses for Medical Students

A course in the techniques of Medical Illustration open to students in each year of medical school, to postgraduates and to the members of the faculty for one afternoon a week throughout the year.

B. Courses for Medical Art Students

I. A regular four year course for applicants with the following qualifications: a Bachelor's degree from an accredited college and a high degree of artistic ability. The major and at least one minor in the subjects pursued should consist of Chemistry, Biology, Physics, Zoology, Comparative Anatomy, Bacteriology or Physiology, and Fine or Applied Art.

Students indicating their aptitude in Medical Illustration and pre-clinical subjects, and being admitted to candidacy for graduate degrees, will on the completion of two years of creditable work be awarded the Master of Science degree in Medical Art.

Further postgraduate study leading to the degree of Doctor of Philosophy in Medical Art may be offered to exceptional students.

Admission to the Department of Medical Illustration does not imply admission to candidacy for a degree.

2. A special course to candidates who lack the above qualifications, but exhibit an unusual degree of art ability and show other acceptable qualifications for this course of study. A certificate is awarded on the completion of three years of satisfactory accomplishment.

FEES. Tuition fees for residents of the State of Georgia are \$250.00 per year; for nonresidents, \$300.00.

THE COURSE CONSISTS OF THE FOLLOWING:

- (a) Surface Anatomy
- (b) Anatomical Dissection and Drawing
- (c) Histology, Embryology and Neuro-Anatomy
- (d) Pathology
- (e) Topographical Anatomy
- (f) Cross-Section Anatomy
- (g) Lettering and Presentation

- (h) Design and Preparation of Charts and Schemata
- (i) Surgical Procedures and Reconstruction
- (j) Techniques of Medical Illustration
- (k) Techniques of Medical Photography
- (1) Mechanics and Ethics of Medical Publishing
- (m) History of Medicine
- (n) History of Medical Illustration

Note: Anatomy, Histology, Embryology, Neuro-Anatomy, Topographical and Cross Section Anatomy, and Pathology are taken with the medical students and the same quality of work is required.

ADMISSION. A prospective applicant for admission to the Department of Medical Illustration should secure from the Office of the Registrar, a blank to be used in applying for admission. This application should be completed and returned to this office at least six weeks before the opening of the quarter in which the student desires to register. The application must be accompanied by an official transcript of all courses taken by the applicant in colleges or schools of fine or applied art, indicating what degree or degrees he has received. This transcript provides information necessary to the President and the Major Professor, and it must be in their hands before the registration of the student can become final.

The Medical College reserves the right to require, in addition to the qualifications already stated for admission, any tests or specific work deemed advisable by the faculty in the interest of the quality of work in this department.

MEDICAL TECHNOLOGY

The Medical College of Georgia is recognized by the Registry of Medical Technologists as a standard school for training Medical Technologists. The graduates are qualified to take the examination offered by the Registry of Medical Technologists and are therefore recognized by physicians as having adequate qualifications, and they have a definite professional standing.

The basic course for Medical Technologists is twelve months and the tuition is \$100.00 for the year. Six additional months' work is permitted free of charge in elective subjects such as x-ray, bacteriology, or further work in clinical pathology or tissue technique.

Ninety quarter hours of college credits are required for admission and the college work must include the following:

BIOLOGY: 18 quarter hours (12 semester hours) of biology, which may include general biology, bacteriology, parasitology, physiology, anatomy, histology, embryology and zoology.

CHEMISTRY: One year of general inorganic chemistry, 9 quarter hours (6 semester hours) including lectures and laboratory, and 4 quarter hours

or 3 semester hours of quantitative analysis, organic chemistry, or biochemistry, including lectures and laboratory.

ELECTIVES: Sufficient to meet the requirements of the Registry of Medical Technologists (90 college quarter hours).

Preference is given to students with a degree.

Four students are admitted at the beginning of each academic year.

Upon satisfactory completion of the course, the student is awarded a certificate.

COURSE OF INSTRUCTION

FIRST QUARTER: Medical Microbiology and General Immunology. The course is designed to familiarize students with the principles of microbiology with special emphasis on those organisms producing disease conditions in man, together with the application of measures for their control, and a discussion of the mechanism of infection and resistance. The disease-producing properties of the commoner pathogenic micro-organisms, with methods for their cultivation, isolation and identification will be studied in the laboratory. The principal serologic methods of diagnosis will be carried out. 16 hours per week; 176 hours. Drs. Sanderson, Dienst and Denton.

SECOND QUARTER: CLINICAL PARASITOLOGY. The course consists of lectures, motion pictures, demonstrations and laboratory studies of the animal parasites of man and their mode of transmission. The field of study covers protozoans, helminths and arthropods of medical importance. 6 hours a week; 66 hours. *Dr. Dienst* and *Denton*.

THIRD QUARTER: CLINICAL PATHOLOGY. Lectures and practical exercises covering the field in this subject. Standard methods are taught. Beginning with examination of the urine and blood, the course is continued to include all the usual laboratory procedures, blood chemical determinations and clinical bacteriology. The hospital furnishes an abundant supply of material. The student carries out all the procedures. 9 hours a week; 99 hours. Drs. Shepeard and Mealing. Histologic Technique. The usual methods of histologic technique are taught in the laboratory of pathology. In addition to demonstrations,

the students are required to prepare satisfactory sections. 24 hours a week for 8 weeks; 192 hours. Dr. E. R. Pund and Miss Josephine Hatch.

FOURTH QUARTER: CLINICAL LABORATORY PROCEDURES. The remaining hours in the first, second and third quarters and all periods of the fourth quarter are devoted to practical demonstrations and repeated performance of various clinical laboratory procedures in the laboratory of the University Hospital. These include hematology, urinalysis, biochemistry, applied bacteriology and serology, blood typing, basal metabolism and electrocardiography. Dr. Shepcard, Pathologist and Mrs. Berta Chandler, Chief Technician, University Hospital Laboratory.

MILITARY SCIENCE AND TACTICS

DETACHMENT 17, 3340 ASU, RESERVE OFFICERS TRAINING CORPS

Jules John McNerney, Major, Medical Corps, United States Army, Professor of Military Science and Tactics

CLYDE CHRIS BOYD, JR, Sergeant First Class, United States Army,
Assistant

One hour per week. Students enrolled in the third and fourth-year courses receive a nominal monthly payment.

War Veterans with six months of military service will receive credit for the first year of the R.O.T.C. course. War veterans with one year, or more, of military service will receive credit for the first two years of the course.

First Year—(Basic Course): World situation, National Defense and ROTC, Organization of the Army, Organization of the Medical Department, Customs of the Service.

Second Year—(Basic Course): Organization and Employment of Medical Service, Military Map Reading, Health and National Security, First-aid, Bandaging and Splinting.

Third Year—Advanced Course): Military Preventive Medicine, Field Medicine and Surgery.

Fourth Year—(Advanced Course): Military Preventive Medicine, Medical Aspects of Atomic Warfare, Military Psychiatry, Military Medical Research.

ELECTION TO MEMBERSHIP IN ALPHA OMEGA ALPHA

Class of 1949-1950

Elected during Junior Year, 1948-1949

JAMES WYNFORD PATE
CHARLES ROBERT IRELAND
